

Plaisted's Rooftop Garden Mix

Lightweight aggregate, compost and washed sand

Plaisted's Rooftop Garden Mixes are designed for extensive and intensive growing environments. **Plaisted's Rooftop Garden Mixes** are designed to be a storm water management system, improve energy efficiency of the building and increase useable space for tenants.

The trend to build rooftop gardens has increased in popularity over recent years by increasing property values, absorbing noise pollution and creating a peaceful meditative environment with aesthetic appeal to building rooftops. The rooftop plants; i.e. small shrubs, grasses, and low profile plants; are being used to process airborne toxins through plant respiration.

Q. Is this a storm water management system?

A. Yes, **Plaisted's Rooftop Garden Mix** is properly engineered and will retain a high percentage of a typical rainfall.

Q. Can you blend to my specific architectural requirement?

A. When we are given the building requirements per square foot we can create exactly the quantity and specification you desire.

Q: Is the **Plaisted's Rooftop Garden Mix** available locally?

A: Yes, the product is available as needed but since it is a special order, please call ahead to reserve your product.

Plaisted's Rooftop Garden Mix

Plaisted's Computerized Blender

Plaisted Companies' four-bin computerized blender has been used to create this product. This unique blender has an on-board screen deck that removes oversized particles and a mechanical paddle wheel that insures uniformity. The computer automatically adjusts for flow rates of material and will stop the conveyor belt when feed bins run out of material. Computerized blending assures a consistent and accurate product... load after load.

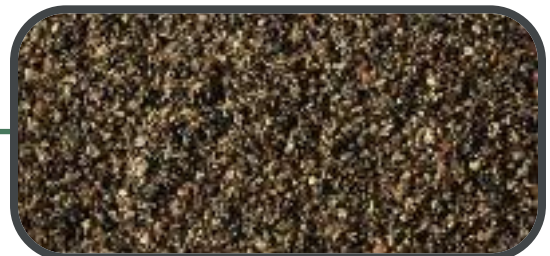

Plaisted's Rooftop Garden Mix is composed of lightweight aggregate, compost and washed sand.

Lightweight aggregate

Compost

Washed sand
