

Plaisted's Dry Sand

Ready to use, no waiting

To ensure that you can get dry sand when you need it, Plaisted has built a **Dry Sand Storage Bin System** that holds multiple types of sand. We can deliver it to you, or we'll load your truck.

For golf and turf applications, dry sand is faster and easier to spread – no more waiting for the sand to cool down prior to using it. Plus, dry sand works into the ground better and is recommended for sand injecting equipment.

Contractors find our dry mason and concrete sands easy to work with as well.

Plaisted's Dry Sand Storage Bin System with multiple compartments to meet customer needs.

Turf applications:

- Topdressing or sand injecting golf course greens, tees and fairways
- Sand injecting sports fields

Contractor Applications:

- Sandblasting
- Underground pipe filling

Plaisted's Sands

GOLF COURSE SANDS

Plaisted's Greens Topdressing – Meets USGA Guidelines. Also available in green.

Plaisted's Fairway Topdressing – Washed and screened firm sand.

Plaisted's Tournament Topdressing – A special fine grade for bentgrass varieties.

CONTRACTOR SANDS

Mason Sand – Natural washed and screened sand used for mortar on concrete blocks and bricks, and for sandblasting.

Concrete Sand – Use to make concrete; coarser than Mason sand.
