

Plaisted's Fairway Topdressing

Fairway Topdressing Helps Golf Course Sustainability

The USGA has reported an amazing number of golf courses are now embracing fairway topdressing as a way to achieve better drainage, healthier grass with less disease, thatch control and firmer conditions, while allowing golf carts back out onto the fairway sooner after heavy rains.*

Plaisted's Fairway Topdressing is a washed and screened firm sand and contains no stones or rocks to wreak havoc on mowing equipment. We deliver it when you need it, and where you want it.

What the experts say:**

Improved drainage and decreased thatch accumulation

Over time, fairway topdressing will provide drier, firmer conditions, primarily because water percolates better through sand, and sand also helps to dilute thatch and expedite its breakdown.

Reduced disease incidence and chemical inputs

Dollar spot, brown patch and *Pythium* are typical diseases found in bentgrass and *Poa* fairways. Each disease is associated with high levels of soil moisture, made worse by thatch. Diluted organic matter holds less water, therefore has lower potential for disease, which reduces the requirement for chemical use.

Improved playability, footing and wear tolerance

In the long run, a fairway topdressing program improves firmness, smoothness, ball lie, and overall playability of your fairways. There are fewer suppressed earthworm castings because sand particles irritate earthworms more than soil mineral particles.

Fairway topdressing is typically applied once a month during the growing season.

PLAISTED BUNKER SANDS

Plaisted bunker sands meet USGA guidelines and are delivered washed and screened.

Plaisted's USGA Bunker Sand – Natural tan color, 2.2 pentrometer index.

Best Signature Tour Blend – Off-white color, 2.4 pentrometer index.

Plaisted's Pro Crushed Bunker Sand – Natural tan color blended with our crushed sand for a 2.5 pentrometer index.

Best Signature 100% Crushed – White color, 2.6 pentrometer index.

Responsive delivery.

Plaisted's experienced drivers operate a fleet of more than 40 trucks — capable of delivering one ton to 25 tons per load. Our GPS locator helps us set the standard for the most responsive delivery system in the 5-state area.

Construction Season Hours:

6:00am to 5:00pm Monday - Friday,
7:00am to 2:00pm Saturday

Winter hours:

7:00am to 4:00pm Monday - Friday
